

SGL Carbon and Onur Materials Services enter into supply contract and cooperation for high-performance insulation components for aeroengines

- Multiyear contract for Onur Air planes
- Onur Materials Services as Sales partner for the Middle East region
- Expansion of customer portfolio and regional footprint

SGL Carbon and Onur Materials Services, a subsidiary of the Turkish airline Onur Air, recently signed a multi-year contract for the delivery of engine cowling blankets for the V2500 engines types of Onur Air's Airbus A321 fleet, totalling 32 engines. Delivery will start in the first half of 2019. In addition, Onur Materials Services will act as a sales partner for the distribution of additional blankets to other renowned airlines in various countries in the Middle East with the sales potential for several hundred additional blankets.

The parts will be manufactured in SGL Carbon's facility in Arkadelphia (Arkansas, USA). The high-performance insulation blankets are used to overhaul the thrust reverser of the engines which is necessary as part of pre-defined regular maintenance cycles. The SGL Carbon facility in Arkadelphia is specialized in the production of certified aerospace components like insulation blankets and other multi-material composite components.

Dr. Andreas Erber, Head of the market segment Aerospace at SGL Carbon: "We are happy to have the Onur Group as a new customer and trusted partner to expand our customer portfolio as well as our global footprint. With the new cooperation we build on long years of material and components expertise for the aerospace market."

Engin Atay, Vice President at Onur Material Service: "We are really proud to be chosen as the preferred sales partner for SGL Carbon. We are specialized in aircraft overhauls and we believe that we are the most professional link between additional airlines and SGL Carbon as supplier for the thrust reverser heat blankets. We have long term relationships with several global operating airlines in the Middle East Region as well as in Asia. The partnership with SGL Carbon is a strategically important long-term agreement for us to achieve our ambitious goals in our long term growth plan."

The high-performance insulation blankets are an established and certified aerospace solution of SGL Carbon. The Parts Manufacturing Approval (PMA) of the Federal Aviation Administration (FAA) for Airbus A320 Family eligible V2500 High Performance Insulation blankets was achieved back in 2009. SGL Carbon has a significant track record in insulation components for various aerospace applications and vehicles.

About SGL Carbon

SGL Carbon is a technology-based company and world leader in the development and production of carbon-based solutions. Its high-quality materials and products made from specialty graphite and composites are used in industrial sectors that determine the future: automotive, aerospace, solar and wind energy, semiconductor and LEDs as well as in the production of lithium-ion batteries and other energy storage systems. In addition, SGL Carbon develops solutions for chemical and industrial applications.

In 2017, SGL Carbon generated sales of around 860 million euros. As of December 31, 2017, the company had approximately 4,200 employees worldwide in 34 locations in Europe, North America, and Asia.

Materials, products and solutions from SGL Carbon are embedded in the major topics of the future: sustainable mobility, new energies and cross-industry digitization. Further developments in these areas demand more intelligent, more efficient, networked and sustainable solutions. This is where the entrepreneurial vision of SGL Carbon evolves around: contributing to a smarter world.

Further information on SGL Carbon can be found in the Newsroom of SGL Carbon at www.sglcarbon.com/press and at www.sglcarbon.com.

Important note:

To the extent that our press release contains forward-looking statements, the latter are based on information that is available at present and on our current forecasts and assumptions. Forward-looking statements, by their very nature, entail known as well as unknown risks and uncertainties that may lead to actual developments and events differing substantially from the forward-looking assessments. Forward-looking statements must not be understood to be guarantees. Instead, future developments and events depend on a large number of factors; they comprise various risks and imponderables and are based on assumptions that may possibly turn out not to be appropriate. These include unforeseeable changes to fundamental political, economic, legal and societal conditions, particularly in the context of our main customers' industries, the competitive situation, interest and exchange rate trends, technological developments as well as other risks and uncertainties. We perceive additional risks e.g. in pricing developments, unforeseeable events in the environment of companies acquired and Group member companies as well as in current cost savings programs from time to time. The SGL Carbon assumes no obligation and does not intend to adjust or otherwise update these forward-looking statements either.
