

34 apprentices will start their careers at SGL Carbon in 2020

On September 1, 2020, SGL Carbon welcomed 33 new apprentices in Germany. At the Meitingen and Bonn sites, the young people started their careers in various technical and commercial professions as well as in dual study programs. An apprentice started work at the Austrian location in the Innkreis at the beginning of August.

The apprentices are going to be trained for their future careers as specialists in a variety of subjects. These include the professions of industrial mechanic, electronics technician for industrial engineering, machine and plant operator, chemical laboratory technician, process mechanic and office clerk. In addition, SGL Carbon has been offering dual courses of study with a business or technical focus for several years. This year four students are starting here in the fields of chemical engineering, electrical engineering, mechatronics and environmental engineering.

Uwe Moderer, Head of Apprenticeship in Meitingen, the largest SGL Carbon site: "Particularly in these special times, it is important to give young people a perspective. We are therefore very happy to welcome our new apprentices."

SGL Carbon hires an average of 30 new trainees each year. The application process for the start of training in September 2021 is already underway. More information on the positions on offer and the application process is available at www.sglcarbon.com/ausbildung.

About SGL Carbon

SGL Carbon is a technology-based company and world leader in the development and production of carbon-based solutions. Its high-quality materials and products made from specialty graphite and composites are used in industrial sectors that determine the future: automotive, aerospace, solar and wind energy, semiconductor and LEDs as well as in the production of lithium-ion batteries, fuel cell and other energy storage systems. In addition, SGL Carbon develops solutions for chemical and industrial applications.

In 2019, SGL Carbon SE generated sales of around 1.1 billion euros. The company has approx. 5,100 employees at 31 locations in Europe, North America, and Asia.

Materials, products and solutions from SGL Carbon are embedded in the major topics of the future: sustainable mobility, new energies and cross-industry digitization. Further developments in these areas demand more intelligent, more efficient, networked and sustainable solutions.

Important note:

To the extent that our press release contains forward-looking statements, the latter are based on information that is available at present and on our current forecasts and assumptions. Forward-looking statements, by their very nature, entail known as well as unknown risks and uncertainties that may lead to actual developments and events differing substantially from the forward-looking assessments. Forward-looking statements must not be understood to be guarantees. Instead, future developments and events depend on a large number of factors; they comprise various risks and imponderables and are based on assumptions that may possibly turn out not to be appropriate. These include unforeseeable changes to fundamental political, economic, legal and societal conditions, particularly in the context of our main customers' industries, the competitive situation, interest and exchange rate trends, technological developments as well as other risks and uncertainties. We perceive additional risks e.g. in pricing developments, unforeseeable events in the environment of companies acquired and Group member companies as well as in current cost savings programs from time to time. The SGL Carbon assumes no obligation and does not intend to adjust or otherwise update these forward-looking statements either.
